DFA Diagram ~

Parse Trees :-

2.

Symbol Table :-

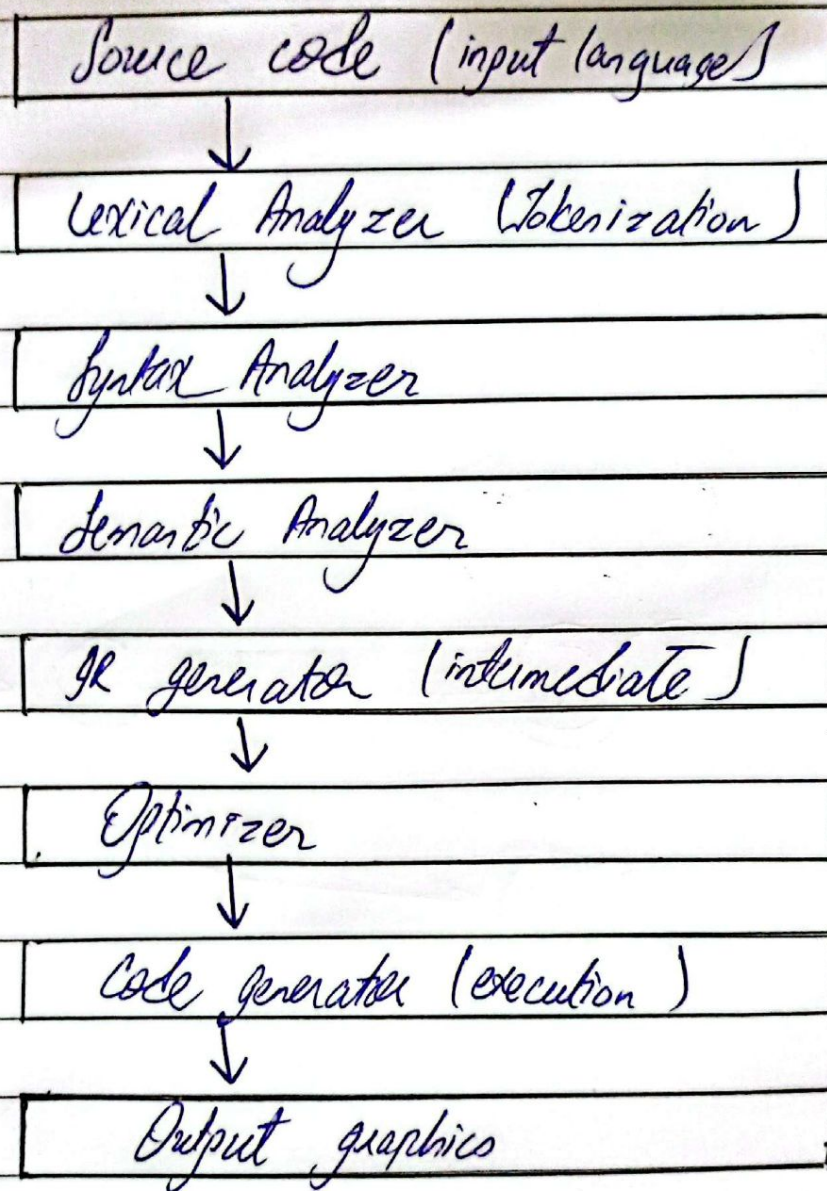

Var name	Type	Scope	Value	Memory status
x	int	global	100	allocated
Size	int	global	150	allocated

Symbolic analysis flow :-

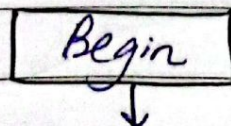

let x = 100 declaration	→	insert into symbol table x → {int, global, 100}
----------------------------	---	--

Forward x	→	lookup x in symbol table declared, type = int
-----------	---	--

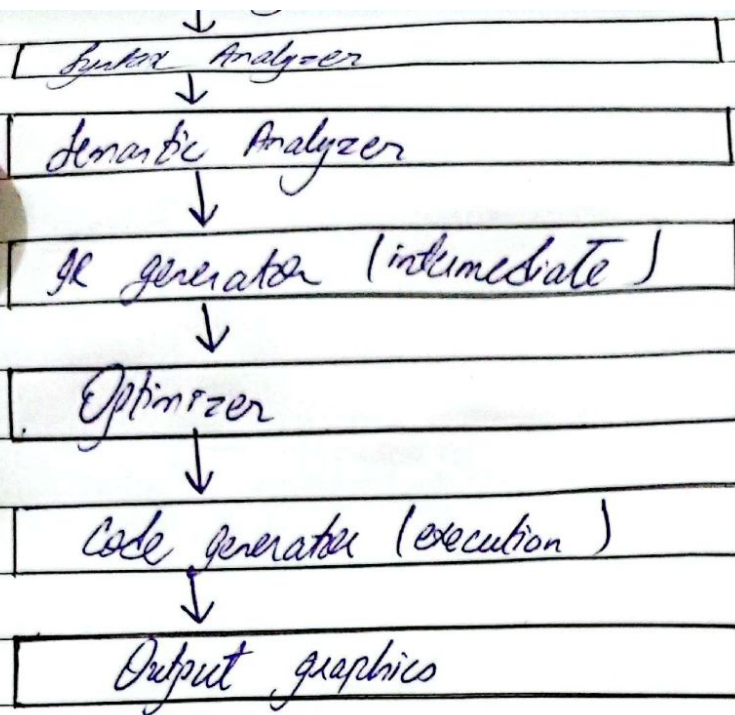

Compiler Pipeline :-

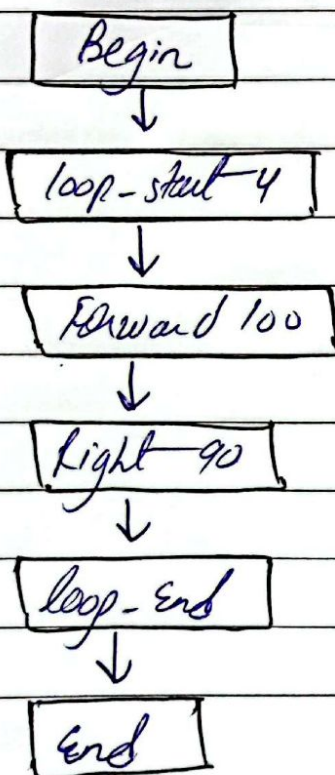

IR Representation :-

SAC program ;

IR Representation :-

Src. program ;

Start

Repeat 4 {

Forward 100

Right 90

}
end
